

DAVID E. J. VAN WIJK, PH.D.

✉ vanwijk@caltech.edu in [david-van-wijk](#) 🔗 <https://davidvwijk.github.io/>

EDUCATION

California Institute of Technology

Postdoctoral Scholar, Mechanical & Civil Engineering

Advisor: Prof. [Joel Burdick](#)

(August 2025 – Current)

Texas A&M University

Ph.D., Aerospace Engineering

Advisor: Prof. [Manoranjan Majji](#)

Dissertation: “Safety-Critical Control of Input-Constrained Systems”

(2021 – August 2025)

Cornell University

B.S., Mechanical & Aerospace Engineering

Advisor: Prof. [Silvia Ferrari](#)

(2017 – 2021)

Magna Cum Laude

RESEARCH FOCUS AND SKILLS

I am a postdoctoral scholar passionate about developing **provably safe control algorithms for autonomous systems**. My research focuses on robotic and spacecraft applications, where I leverage insights from control theory, optimization, and estimation to enhance the reliability of autonomous operations in complex environments.

Research Interests: Safe autonomy, Control theory, Autonomous vehicles, Nonlinear systems, State estimation

Programming Languages: Python, MATLAB, C++, Git, Java, LaTeX

Tools: Simscape Multibody, ANSYS, SolidWorks

PUBLICATIONS

* indicates equal contribution

- C4. **D. van Wijk**, M. Majji, and K. L. Hobbs, “Fault Tolerant Run Time Assurance with Control Barrier Functions for Rigid Body Spacecraft Rotation,” *AIAA SciTech 2024 Forum*, Orlando, Florida, USA, 7-12 January 2024. ([link](#))

- C3. **D. van Wijk**, K. Dunlap, M. Majji, and K. L. Hobbs, “Deep Reinforcement Learning for Autonomous Spacecraft Inspection using Illumination,” *2023 AAS/AIAA Astrodynamics Specialist Conference*, Big Sky, Montana, USA, 13-17 August 2023. ([link](#))
- C2. K. Dunlap, **D. van Wijk**, and K. L. Hobbs, “Run Time Assurance for Autonomous Spacecraft Inspection,” *AAS/AIAA Astrodynamics Specialist Conference*, Big Sky, Montana, USA, 13-17 August 2023. ([link](#))
- C1. **D. van Wijk**, K. Eves, and J. Valasek, “Deep Reinforcement Learning Controller for Autonomous Tracking of Evasive Ground Target,” *AIAA SciTech 2023 Forum*, National Harbor, Maryland, USA, 23-27 January 2023. ([link](#))

OTHER PUBLICATIONS

- O1. **D. van Wijk**, “Stochastic Control Barrier Functions for Economics,” *arXiv*, 2023. ([link](#))

AWARDS AND HONORS

- **Texas A&M Graduate Excellence Fellowship Award (Fall 2022, Fall 2023)**: Open and highly competitive fellowship award of \$1000, selected by the Texas A&M Department of Aerospace Engineering Graduate Program Committee.
- **Texas A&M Graduate Merit Fellowship (2021 – 2025)**: Highly competitive fellowship awarded to a single student in the Aerospace Engineering department per year.
- **Cornell University Dean’s List**: Spring 2018; Fall 2018; Spring 2019; Fall 2019; Fall 2020; Spring 2021

OUTREACH AND MENTORSHIP

- **Camp SOAR Outreach** (2022, 2023): Led laboratory tours and demonstrations for high school students interested in STEM.
- **Texas A&M Physics Festival** (2022, 2023, 2024): Led demonstrations for students K-12 to inspire the next generation of STEM students.

PROFESSIONAL SERVICE

- **Session Chair**: *AAS/AIAA Astrodynamics Specialist Conference 2023*, led and organized four technical sessions.
- **Reviewer**: *IEEE Control Systems Letters* (2), *IEEE American Control Conference 2025* (2), *AIAA Journal of Guidance, Control, and Dynamics* (1), *AIAA Journal of Aerospace Information Systems* (3), *Journal of the Astronautical Sciences* (1), *AIAA SciTech Conference 2024* (5), *AIAA Ascend 2024* (3)

INVITED TALKS

- I1. “Fault Tolerant Run Time Assurance with Control Barrier Functions for Rigid Body Spacecraft Rotation.” *Air Force Research Laboratory, Safe Trusted Autonomy for Responsible Spacecraft Annual Review*. October 2023.
- I2. “Safety-Critical Control of Input-Constrained Systems.” *Princeton University*. April 2025.
- I3. “Safety-Critical Control of Input-Constrained Systems.” *California Institute of Technology*. April 2025.

SELECT RESEARCH EXPERIENCE

Safe Autonomy for Spacecraft Control (Aug ‘22 – Aug ‘25)
Research Internship with Dr. Kerianne Hobbs, Air Force Research Laboratory (AFRL), Safe Autonomy Team
Trained reinforcement learning agents for autonomous rendezvous, proximity operations, and docking (ARPOD) scenarios, and developed control barrier function based run-time assurance algorithms to guarantee safety of those agents. (J4, J2, C6, C4, C3, C2)

Simulation and Control of 7-DOF Spacecraft Manipulator (Aug ‘23 – Jan ‘24)
Graduate Research with Arkisys and Prof. Manoranjan Majji, Texas A&M University
Developed and validated a control system and manipulator planning system for 7-DOF robotic arm mounted on free-flying spacecraft using MATLAB Simulink and Simscape Multibody.

Spacecraft Maneuver Classification using ML (Jan ‘23 – May ‘23)
Graduate Research with Ten One Aerospace, LLC and Prof. Manoranjan Majji, Texas A&M University
Built simulation of ground sensor and spacecraft dynamics to perform machine learning (ML) analysis for learning maneuver intent from ground sensor image traces.

Path Planning for Autonomous Drone (Jun ‘19 – May ‘21)
Undergraduate Research with Prof. Silvia Ferrari, Cornell University

Implemented and flight-tested custom algorithms for path planning in the presence of obstacles for an autonomous drone in occluded environments. (J1)

RELEVANT GRADUATE COURSEWORK

Optimal Control; Nonlinear Control; Intelligent Systems and Robotics; Estimation of Dynamic Systems; Intuitive Robotic Mechanisms; Artificial Intelligence; Spacecraft Dynamics & Control; Intelligent Sensor Planning & Control
